

Which ACG Learning Path is Right for Me?

As you make your move to the A Cloud Guru platform, you may notice that ACG Learning Paths work a bit differently than the Linux Academy Learning Paths you're accustomed to.

ACG does not have as many Learning Paths in raw numbers, but its Learning Paths tend to be more encompassing. Where you might progress through three different paths in Linux Academy as your skills advance, ACG Learning Paths have you progress to different skill

levels within the Learning Path itself, all the way from novice to guru.

Also, the ACG Learning Paths frequently update to match current industry needs, so if things look different from the LA Learning Path you were on, well, the cloud is always changing. Our Learning Paths change with them as new trails are blazed and new ground needs to be covered. That way, you're always getting the most up-to-date knowledge.
